web www.sea-systems.co.uk
01322 619155

And lastly the launch of a new company and a new service just for SME's (Small and Medium sized Enterprise).

No Frills Business Solutions (NFBS) has launched a new service to help companies improve performance and reduce accounting costs by up to 50%. NFBS promises to give company owners and decision makers personalised, simplified, timely, accurate and regular management accounts, at a price that any SME can afford.

Neville Gaunt, a founding director of NFBS and a member of Swanley Chamber of Commerce Executive believes that every local economy needs to thrive and provide jobs for all ages in the local community. He says,

"The economy is experiencing difficult conditions and for every community it's important that every SME maintains it's position and helps the economy recover. Now more than ever, entrepreneurs need to be free of process and concentrate on real business. At NFBS, our unique solution takes away the process headache, giving owners regular, valuable and reliable information so

they can make the best decisions.... and we solve the statutory reporting requirements like VAT and tax returns, at the same time."

The founders of No Frills Business Solutions have extensive knowledge and experience of working with large companies. They have developed a pragmatic, no frills solution that any company can adopt and at a price they can afford.
